GENERAL: AB-575S is a laser-printable (satin side only) satin acetate with an acrylic primer coat on the back side designed for pressure-sensitive adhesive lamination. AB-575S demonstrates a superior punching property, excellent smoothness of hand, and fair resistance against fadeout of imprinting from repeated commercial washings and dry cleanings. The product is also non-fraying, highly resistant to shrinking or curling, and effectively resistant to degradation from rot, mildew, and perspiration.

Recommended Printing Methods: Laser (Dry Toner), Dot Matrix, Hot Stamping, and other impact-style print methods.

ALL VALUES SHOWN ARE AVERAGE VALUES OBTAINED FROM COMMERCIAL PRODUCTION. THEY ARE INTENDED AS A GUIDE TO PRODUCT PROPERTIES AND NOT TO BE REGARDED AS SHIPPING SPECIFICATIONS.
