

# SEAM SEALER

## WATER-BASED SEAM SEALING SYSTEM

UPACO waterproofing solutions have set the standard for seam sealing waterproof footwear for over a decade. The range of products listed cover many chemistries that provide excellent waterproofing while also meeting the requirements for the majority of current restricted substance lists globally.

- Waterproofing
- Low Emission
- Eco-friendly
- Safe to Use

Based on the concept of "stitch-a-hole/seal-a-hole." Both natural and synthetic seam sealers are available to complete the water-proofing package.

### PRIMER SEALANT

5611	5612
P5012	P5480

### CHEMISTRY

Water-based Natural Latex

Water-based SBR Latex
