

UPACO

A Worthen Brand

SEAM SEALER

WATER-BASED SEAM SEALING SYSTEM

UPACO waterproofing solutions have set the standard for seam sealing waterproof footwear for over a decade. These products deliver exceptional waterproofing performance through a diverse range of advanced chemistries. Each solution not only ensures superior protection against water penetration but also complies with the most rigorous global restricted substance lists, meeting the demands of modern manufacturing standards.

Low
Emission

Waterproofing

Eco-Friendly

Safe to Use

Based on the concept of "stitch-a-hole/seal-a-hole." Our range includes both natural and synthetic seam sealers, each designed to ensure complete protection against water intrusion. These sealers play a critical role in completing the waterproofing package, offering a reliable solution for enhanced durability and functionality in every application.

Primer	Sealant	Chemistry	Bonds To
5611	5612	Water-based natural latex	Broad spectrum of uppers
P5012	P5480	Water-based SBR latex	Broad spectrum of uppers
